Subject: RE: [REDACTED]

The Lab basically states that the confirmatory chemist can review and testify to the work of the primary and that Stacey followed the policies and procedures of the lab.

We try to avoid re-testing especially if the sample is a residue because I can not guarantee that we will have sufficient sample for a positive result.

Sorry.

Annie

Hey Annie,

How are you? Have you heard anything on how we are to handle this issue with re-testing the drugs on the [REDACTED] case? I am on for Tuesday for status. Let me know when you have a chance. Thank you and have a great weekend.

Mike
